DEMAGNETIZER
CODE 0509-DG15

- Copper wire coils, can eliminate residual magnetism in molds and components
- Built-in thermal protector, automatic power-off to prevent overheating and automatic reset after cooling down

SPECIFICATION

Working time	30 minutes continuously
Action temperature	100°C
Reset temperature	60°C~70°C
Power	200W
Power supply	220V 50Hz
Dimensions (L×W×H)	140×100×70mm
Net weight	2.4kg
