

Range: 0-360°  
 Graduation: 5'  
 Accuracy: ±5'

- 1-300mm ruler
- 2-Ruler locking screw
- 3-Inner dial
- 4-Outer dial
- 5-Fine adjustment screw
- 6-Locking screw
- 7-Base ruler
- 8-Angle attachment
- 9-150mm ruler
- 10-Clamp for height gages (Optional accessory, code: 2372-CLAMP)

1. In the 0° position, the ruler and base ruler unevenness are normal and do not affect the angle measurement.

2. Install ruler and angle attachment:

- Loosen ruler locking screw
- Install ruler, insert ruler along the slot (fig 1), tighten the locking screw
- Install angle attachment as fig 2 if need

fig.1

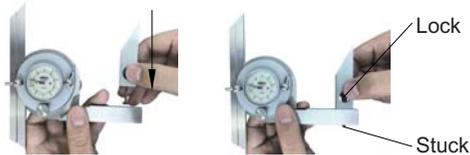

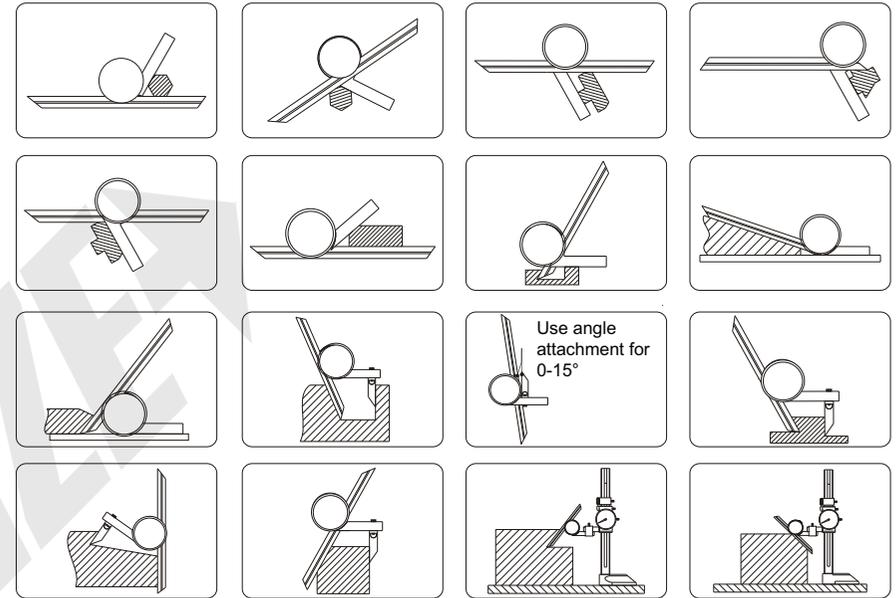

fig.2

3. Please clean the measuring faces with soft cloth before measurement, avoid dust or sundry to effect the results.

4. Measurement diagrams:

5. The reading is the sum of the inner and outer dial reading. For the outer dial reading, select the same background color as the inner dial (acute angle). As shown below:
