

MANUAL PERMANENT MAGNETIC LIFTER

PML

Application : Widely used in machining and mould processing industry.

Features :

1. Adopt high quality NdFeB magnetic material, magnetic with high concentration and permanent constant.
2. The safe load factor 3.5 times. Even if the air gap between the work piece and lifter is big, can also guarantee the best working status.
3. Move the handle to change the magnetic force "On" and "OFF"
4. V-shaped groove at the bottom for holding corresponding cylindrical objects.
5. New structure design, with anti-collision handle, this permanent magnetic lifter is more durable.
