

Car Measuring Device PCE-ACT 10

Car measuring device PCE-ACT 10

Vehicle measuring instrument with a total of approx. 12 meters (39 ft) of cable / Voltage measurement / Supply voltage via on-board voltage / Measuring range up to 65V / Frequency measurement / Various connection adapters / LED lighting

The automotive voltage tester PCE-ACT 10 is a versatile measuring device in the automotive sector. Possible measuring functions are voltage measurement, resistance measurement and diode measurement. In addition to these measurement functions, the automotive voltage tester can also be used as an oscilloscope to analyze a voltage curve more accurately. This automotive voltage tester uses as power supply the voltage applied to the vehicle, which is made possible via the supplied adapter for the cigarette lighter, or directly via the connection to the vehicle battery. This has the advantage that consumers can be powered directly via the automotive voltage tester to check the function. In order to be able to use the vehicle voltage tester at any point of your vehicle, the vehicle voltage tester has a 6 meter cable.

- ▶ Various measuring functions
- ▶ Adapter for cigarette lighter
- ▶ LED lighting
- ▶ Power supply directly from the vehicle
- ▶ Total connection length approx. 12 meters / 39 ft
- ▶ For laying a power supply

Specifications

Measuring range voltage measurement	0 ... 65V
Measuring range resistance measurement	0 ... 100 k
Measuring range frequency measurement	0 Hz ... 10 KHz
Cable length	About 12 m / 39 ft
Power supply for direct control	Max. 10 A
Display	160 x 128 pixels TFT color display
Operating conditions	0 ... 60°C / 32 ... 140°F
Storage conditions	-40 ... 70°C / -40 ... 158°F
Voltage supply	12 ... 24V
Dimensions	178 x 47 x 28 mm / 7 x 1.9 x 1.1 in
Weight	About 336 g / < 1 lb only handheld
