

## Special Bases for Dial Depth Gauges

Due to its prismatic form the Base TB 66 P is particularly suited for measurements on tubes with a diameter of 10 – 100 mm.

Bases for Dial Depth Gauges with flat bearing surfaces are available in the following dimensions:

<b>Base TB 200</b>	200 x 20 mm
<b>Base TB 250</b>	250 x 20 mm
<b>Base TB 300</b>	300 x 25 mm

All Bases have a bore  $\varnothing$  of 8 mm H 7. The Bases are burnished and the measuring contact surface is ground very finely. Bases with special lengths are available on request.
